

Mobility Services

Business now happens on the move, whether as the core or an enhancement to your solutions. We can help you see how best to use mobile technology so you can do your business best.

MANAGED BUSINESS SERVICES

What is Mobility?

Mobility is one of the most powerful new business tools technology has afforded us. Your employees can take work where they go, your customers can engage where they please and information can flow freely across your organisation, bridging the walls of silos and bringing immediacy to processes.

Mobility represents how technology makes information mobile. From an employee logging in off-site from their laptop to remote printing and document capture, if it's done on the move, away from the desk, it's mobility. Even at a desk, any tool that reduces a cumbersome process to a few swipes on a device is mobility.

Core features

- Modernise business functions for a new workplace.
- Employees can securely access work on their own devices.
- Enable employees to issue quotes and other documentation on the fly.
- Stop mobile security risks and unauthorised document sharing.
- Manage call and device costs through active monitoring.
- Capture and automatically administer paperwork.
- Integrate with existing business systems.
- Support a broad family of device platforms and popular file formats.
- Enable the easy and secure distribution of documents.
- Don't lose sleep over data regulation requirements.
- Expect fast deployment and easy scaling that grows with your business.

Why ITEC?

- ✓ We are experts at integrating traditional environments with new technologies.
- ✓ Our connectivity experience ensures your business and staff are always online.
- ✓ We are partnered with top vendors in the market, using only best-of-breed solutions.
- ✓ Our solutions are built from proven applications such as M-Files and ITEC Sentry.
- ✓ Recognised leaders in document capture solutions and digitising paper-based environments.
- ✓ Our mobility solutions cover security, connectivity, document management and cloud services.

DID YOU KNOW?

Mobility solutions take careful planning, starting with what you require:

1. Do you need to capture and automate your administration?
2. Are you concerned over costs?

3. Is there room for improving productivity?
4. Will services work better if they're integrated with your business systems?

We will assess these requirements with you before we propose the best mobile solution.

Cost savings, automation and active monitoring

Empower your workforce

Enable your employees to work on the go. They can board an aeroplane in Durban, sending documents to the Cape Town office printer, releasing the print when they get there. They can make secure conference calls and share valuable documents without compromising security. They can capture invoices with their phone, which is automatically filed and allocated by the administration system. Once freed from their desks, your employees can be more effective. Mobility is the answer.

Create effective ECM and document capture

Don't let your company's best ideas get lost. Automate the capture and storage of knowledge. ITEC uses mobility and best-of-breed platforms for ECM (Enterprise Content Management), providing seamless electronic workflows for paper-based documents.

This can be done through scanners on multifunction printers (MFPs) or using cameras on phones. Your paperwork will take care of itself.

Lower Costs

Mobility equals lower costs. Mobile and laptop devices can easily access modern applications such as M-Files and Office365. Professionally-designed apps add to the experience, but you only pay for what you need and nothing more. An office that embraces mobility works faster, smarter and leaner. You not only own less infrastructure that needs constant investment, but you can use device management to monitor usage and costs, enabling you to plan without the guesswork.

Integration with existing systems

Adopting mobility does not mean throwing away your existing systems, but instead becomes a new point of contact for them. Over time you can update your technology investments, phasing out the older systems without upsetting the environment. ITEC is a leading implementer of systems integration, marrying the best modern solutions with the tried-and-tested systems that power your business.

Mobile security

Don't let the fear of cyber attacks keep you away from the power of mobility. A well-implemented mobility solution reflects your IT security policies. Keep devices sound and clean from malware, stop the wrong apps from accessing business documents and if someone joins your organisation, have them ready to go within minutes through automatic, individual enrollment.

Hosted platforms for ease of access and security

Move operational burdens off your infrastructure and onto cloud environments by using mobility platforms. These scale, are very affordable, able to be cost-managed at a granular level. Mobility and the cloud go hand in hand, so it stands to reason that the way to get the most out of the cloud depends on enabling the mobile devices in your business.

Integration for MFPs

Create synergy between print services, document capture and a mobile workforce like never before. Use mobile devices to print crucial documents at the nearest printer or capture important paperwork on an MFP, sending it to a mobile device.

Get in line with regulations

As legislation such as the Protection of Personal Information Act (POPI) becomes commonplace, you want to know your information is secure without inhibiting business from transacting. By using solutions such as M-Files, document sharing and storage can be both accessible to employees while keeping within regulations.

OTHER MANAGED BUSINESS SERVICES

Communications

The message is more important than the medium, especially when we have assessed your business to give you access to all the tools of communication you need. PABX, mobile, video conferencing, data calling... whatever works for your business to get the message across.

IDMS

We can seamlessly integrate cloud-based digital services with your in-house ERP systems, saving a lot of time and money. This way you get all the benefits of systems that can talk to each other, without changing what you already have.

Security

We can integrate security into every part of your business so that you are more prepared for disaster recovery, business continuity, more aware of your employee activities and have a solid operational awareness of your technology.

Cloud

We can help you to run your business applications and hardware on the cloud. Since everything in the cloud is more connected, you can securely cross reference and share information across different applications.
