

CYBERSECURITY MADE SIMPLE

VISIT itecgroup.co.za/services/sophos

Protection. Visibility. Expertise.

Traditional security can't keep up with the constantly changing threat landscape. Sophos solutions deliver the world's best protection, innovating new solutions to continuously improve your cybersecurity. *Click on the icons below to view information.*

Endpoint Protection

Sophos Central Intercept X Advanced

Stop unknown threats, block exploits,
block ransomware, deny hackers.

Sophos Mobile

Secure Unified Endpoint
Management (UEM) solution.

Central Device Encryption

Full disk encryption:
the first line of defence.

Network Protection

Sophos XG Firewall

XG Firewall makes it easy to extend your
secure network to employees anywhere.

SG UTM

Proven protection for your network –
simpler, faster, better.

Secure Web Gateway

Advanced web protection
made simple.

Sophos Wireless

Easy to deploy and manage, so your wireless
networks are up and running in no time.

Cloud Protection

Sophos Cloud Optix

Optimise cloud costs and improve security.

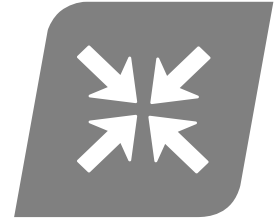

Server Protection

Intercept X for Server

Secure your cloud, on-premises, or hybrid server environments.

Central Management

Sophos Central

The unified console for managing your Sophos products.

Email Protection

Sophos Email

Defeating today's threats with an eye on tomorrow.

Phish Threat

Phishing attack simulation and training for your end users.

SOPHOS CENTRAL INTERCEPT X ADVANCED

Endpoint Protection

Malware, Ransomware, Exploits, Viruses.

Intercept X is the industry's most comprehensive endpoint protection built to stop the widest range of threats. Intercept X Advanced combines the capabilities of Intercept X and Central Endpoint into a single solution and single agent.

Endpoint Detection and Response (EDR)

Take threat hunting and IT security operations to the next level with powerful querying and remote response capabilities.

Anti-Ransomware

Ransomware file protection automatic file recovery and behavioural analysis to stop ransomware and boot record attacks.

Deep Learning Technology

Artificial intelligence built into Intercept X that detects both known and unknown malware without relying on signatures.

Exploit Prevention

Deny attackers by blocking the exploits and techniques used to distribute malware, steal credentials and escape detection.

Managed Threat Response

Elite team of threat hunters and response experts who take targeted actions on your behalf to neutralise even the most sophisticated threats.

Active Adversary Mitigations

Active adversary mitigation prevents persistence on machines, credential theft protection and malicious traffic detection.

SOPHOS MOBILE

Endpoint Protection

Secure Unified Endpoint Management (UEM) solution and Mobile Threat Defense (MTD).

Sophos Mobile is a Unified Endpoint Management (UEM) and Mobile Threat Defense (MTD) solution that helps businesses spend less time and effort to manage and secure traditional and mobile endpoints. The only UEM solution that integrates natively with a leading next-gen endpoint security platform, Sophos Mobile and secures iOS, Android, Chrome OS, Windows 10 and macOS devices.

Sophos Mobile means Enterprise Mobility Management

Devices

- iOS, Android, Windows 10, macOS
- Configuration and policies
- Inventory and asset management
- Detailed reporting

Apps

- Install, remove, and view apps
- Enterprise app store
- App control, whitelist/blacklist
- Manage and configure Office 365 apps

Content

- Email and document container
- Publish content
- Container-only management
- Native OS containerisation

Security

- Compliance rules and remediation
- Malware, ransomware, PUAs
- Anti-phishing
- Web protection, web filtering

CENTRAL DEVICE ENCRYPTION

Endpoint Protection

Full disk encryption: the first line of defence.

Sophos Central Device Encryption is cloud-based, easy to set up and manage Full Disk Encryption, all integrated into Sophos Central. Leverage Windows BitLocker and macOS FileVault to secure devices and data in minutes with Sophos Central Device Encryption.

Disk Encryption

Protect devices and data with full disk encryption for Windows and macOS, managed alongside our entire cybersecurity portfolio in Sophos Central.

Intuitive

Easy to setup, easy to manage. There's no server to deploy and no need to configure back-end key servers. Start securing devices in minutes.

Compliance

With the increase in remote working, it is more important than ever to secure devices and data. Verify device encryption status and demonstrate compliance.

Self-service Portal

Reduce calls to the IT helpdesk. The self-service portal lets users regain access to their devices so they're backed up and running faster - and IT has one less ticket to deal with.

Secure File Share

Confidentially share sensitive files. A password protected HTML wrapper ensures only recipients with the correct password can access a document.

Visibility

Give admins visibility of devices across their estate. Simply ensure machines have been encrypted, or drill down into details about disks and encryption methods.

SOPHOS XG FIREWALL

Network Protection

XG Firewall makes it easy to extend your secure network to employees anywhere.

Sophos XG Firewall provides comprehensive next-generation firewall protection that exposes hidden risks, blocks unknown threats, and automatically responds to incidents. XG Firewall is part of the world's best cybersecurity ecosystem, integrating in real time with Sophos Central and Intercept X.

Enterprise Protection

Visibility, protection
and response.

All-in-One Protection

Consolidate, simplify
and save.

School Protection

Affordable, simple
compliance and control.

SD Wan & Branch

Retail, branch office, ICS
and SD Wan.

Endpoint Integration

Synchronises security and
automated response.

Public and Private Cloud

Protection for AWS,
Azure, Nutanix and Hybrid
networks.

SG UTM

Network Protection

Proven protection for your network – simpler, faster, better.

Sophos UTM drives threat prevention to unmatched levels. Sophos UTM provides the ultimate network security package with everything you need in a single modular appliance. It simplifies your IT security without the complexity of multiple point solutions.

Deep Learning Protection

Sophos UTM drives threat prevention to unmatched levels.

Lightning Speed

We've engineered Sophos UTM to deliver outstanding performance.

All-in-One Protection

We offer the latest next-gen firewall protection you need plus features you can't get anywhere else.

Logging & Reporting

Our built-in reporting means you'll know exactly what's happening with your users.

Flexible Deployment

Sophos UTM is unmatched in its deployment flexibility: choose from hardware, software, virtual or cloud with simple options.

Awards & Reviews

As a Gartner Magic Quadrant Leader for UTM, Mobile Data Protection and Endpoint, we're at the forefront of the security industry.

SECURE WEB GATEWAY

Network Protection

Advanced Web Protection Made Simple.

Sophos Web Gateway provides security, visibility, and control for all your desktop PCs, Macs, Chromebooks, and mobile devices, regardless of how or where they access the web. Sophos Web Protection provides enhanced protection against web threats.

Advanced Protection

Get the most advanced protection from ransomware and targeted threats.

Easy Ownership

We've made web protection simple, from deployment, to daily management, and even support.

Protection Everywhere

For every user, on every device, everywhere they go.

Lightning Performance

Transparent protection that won't slow your users down.

Instant Visibility

Get instant visibility into activity on your network with rich reporting and intelligent dashboards.

Granular Controls

All the policy control you need to keep your users productive and compliant online.

SOPHOS WIRELESS

Network Protection

Easy to deploy and manage, so your wireless networks are up and running in no time.

Sophos Wireless combines the power of the Sophos Central platform and our unique Security Heartbeat™ functionality. It monitors and acts upon the health status of connected endpoint and mobile clients to reduce the risk to your trusted Wi-Fi networks.

Synchronised Connectivity

Automatically control access for managed clients based upon their health status.

Threat Discovery

Threats on and to your Wi-Fi networks are instantly classified - for example, as rogue APs, spoofing attempts or unknown devices.

Modular Management System

Manage wireless on its own or along all your Sophos Central-managed security solutions.

Cloud ptix

SOPHOS CLOUD OPTIX

Cloud Protection

Optimise cloud costs and improve security.

Optix delivers the continuous analysis and visibility organisations need to detect, respond, and prevent security and compliance gaps while finding ways to optimise cloud spend. The Sophos Cloud Security Posture Management tool provides a single view of security posture across AWS, Azure, Google Cloud, Kubernetes and infrastructure-as-code environments.

Multi-cloud Visibility

View inventories and visualisations for AWS, Azure, Google Cloud, and Kubernetes. Continually analyse for security risks, over-privileged access and spend anomalies.

Fix Security Gaps Fast

Get automatic identification and risk-profiling of security and compliance risks, with contextual alerts grouping affected resources, detailed remediation steps, and guided response.

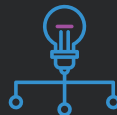

Optimise Cloud Costs

Track cloud services side by side on a single screen improved visibility, receive independent recommendations to reduce spend and identify indicators of compromise.

Stay Compliant

Automate compliance assessments, save weeks of effort mapping Control IDs from overarching compliance tools to Cloud Optix, and produce audi-ready reports instantly.

Smarter DevSecOps

Seamlessly integrate security and compliance checks at any stage of the development pipeline to detect misconfigurations and embedded secrets, passwords and keys.

Integrate Seamlessly

Access cloud Optix features programmatically via a REST API and integrate seamlessly with third-party services such as SIEM and DevOps tools to streamline security operations.

INTERCEPT X FOR SERVER

Server Protection

Secure your cloud, on-premises, or hybrid server environments.

Sophos Intercept X for Server employs a comprehensive defense-in-depth approach to server protection, rather than simply relying on one primary security technique. Intercept X Advanced for Server prevents attacks from reaching the server; detects attacks before they run, and cleans up damage in case of a breach.

All-In-One Server Protection

Combining server-specific features to create a comprehensive, defence-in-depth solution.

Automated Server Threat Detection & Response

Get unparalleled visibility of your servers whether they are; cloud, on premises or virtual.

Straightforward Licensing & Deployment

Designed from the ground up to be easy to understand and use.

Synchronised Security

Share data between your Sophos servers and firewalls, making your protection faster and smarter.

Take Control of your Servers

You can control exactly what can and can't run, so your server configurations stay safe and secure.

SOPHOS CENTRAL

Central Management

The unified console for managing your Sophos products.

Sophos Central helps you manage security policies and administer multiple products from a single web interface. No management servers to deploy or install, your endpoints, servers, appliances, and devices will check in directly with Sophos Central to receive new settings, send alerts, and share contextual security intelligence.

Manage all your Products

From a single interface.

Intuitive Dashboard

Respond to alerts, track licenses and track upcoming renewal dates.

Synchronised Security

The defences ensures your endpoint protection and firewall are talking to each other.

Not Just for Admins

The Partner Dashboard and the Self-Service Portal allow the partners as well as users to login and customise their profiles.

SOPHOS EMAIL

Email Protection

Today's email threats move fast, and growing businesses need predictive email security – defeating today's threats with an eye on tomorrow.

Sophos Email is a cloud-based secure email gateway solution for Sophos Central. Built to integrate seamlessly with popular email platforms, Sophos Email is engineered to keep businesses safe from email threats, simply stopping spam, phishing, malware, and data loss.

Block Phishing Imposters

We've made it simple to block phishing imposters and protect employees from attacks.

Protection from Spam

Ensure your Sophos Email gateway won't miss any of the thousands of new threats discovered every hour.

Respond to Cyber Threats Faster

Integrated into Sophos Central, lets you build and manage multiple lines of defence.

Connected Email Security

Takes Sophos Email beyond the benefit of unified management.

Prevent Data Loss

Provides advanced data breach prevention with policy-based email encryption.

Email Encryption

Secure sensitive data and make compliance easy. Alternatively give users the option to encrypt emails themselves with our O365 add-in.

PHISH THREAT

Email Protection

Phishing attack simulation and training for your end users.

Phish Threat lets you test your users' response to phishing campaigns. Sophos Phish Threat allows you to simulate phishing attacks and assess how your users respond to them. It also allows you to distribute anti-phishing training to your users.

Reduce your Largest Attack Surface

A solid security awareness program is an integral part of any defence-in-depth strategy.

The Freshest Phishing Campaigns

End users are the largest, most vulnerable target in most organisations.

Effective Security Training

More than 30 security awareness training modules.

Comprehensive Reporting

Understand your organisation's security health and demonstrate real return on investment.

Report Phishing from Outlook and O365

Turn all employees into an active line of defence against email phishing attacks.

Intelligent Cybersecurity Awareness Training

Identify users who have been warned or blocked from visiting a website due to its risk profile.
