QUALITY PEOPLE,
SMART TECHNOLOGY SOLUTIONS

ITEC
QUALITY PEOPLE, SMART TECHNOLOGY SOLUTIONS

WHAT WE DO

A single point of contact for cost-effective, managed technology services.

Itec's Managed Business Services address technology challenges in your business processes, and then manage the operational implementation of that solution as a service.

We are a Level 1 B-BBEE accredited vendor providing all the services your business needs in one place, including document management, communications, and security, which all have the option of being cloud-based and mobile.

Our team has both strategic and operational expertise in the hardware, software and technology powering these services. After identifying your requirements, our team suggests the most cost-effective combination of owning, integrating or renting the systems that will run your technology, then we manage them for you so you can build a mobile, agile, connected business.

✔ Certified Level 1 B-BBEE

⚐ 47 offices across Southern Africa

🏆 Partnerships with SA's leading Tier 1 Network Providers

⇄ Importer and distributor of leading technology brands

🌐 First to offer a Certified Carbon Offset Programme

Itec Managed Business Services

Communications

The message is more important than the medium, especially when we have assessed your business to give you access to all the tools of communication you need. PABX, mobile, video conferencing, data calling and connectivity… whatever works for your business to get the message across.

Security

We can integrate security into every part of your business so that you are more prepared for disaster recovery, business continuity, more aware of your employee activities and have a solid operational awareness of your technology.

Cloud

We can help you to run your business applications and hardware in the cloud. Since everything in the cloud is more connected, you can securely cross reference and share information across different applications.

Document Management

We can seamlessly integrate cloud-based digital services with your in-house ERP systems, saving a lot of time and money. This way you get all the benefits of systems that can talk to each other, without changing what you already have.
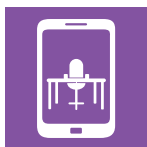

Mobility

Business now happens on the move, whether as the core or an enhancement to your solutions. We can assist you in the adoption and implementation of a mobile technology strategy.

Finance

Our in-house finance solutions offer customers flexible, affordable and accessible finance, managed by highly capable consultants who help to structure any deal simply and efficiently.

WHERE TO GO FROM HERE | Index

COMMUNICATIONS

More than just a call

Connectivity and communications are no longer different things but operate on the same technology foundation.

This creates one business network that is available to nearly any part of the country, whether connecting via fixed line or wireless mediums. The benefits include immense savings and unlocking new levels of collaboration, business intelligence and customer service.

It is no longer necessary to own the equipment and platform, other than the end-user devices such as phones and headsets. Itec will manage your communication needs as a service, reducing costs, streamlining and integrating your systems and improving your clients' experience of your brand.

Future proof and simplify your business's ever-growing and ever-changing technology requirements.

Connectivity

Itec will work with you to assess your solution requirements by looking at and understanding your exact connectivity requirements. We will then propose a solution from our range of APN, Microwave and Fibre products that are customised and scalable, designed to assist in managing and limiting unnecessary network cost. Once approved, we will fully manage the implementation and handover of the installation whereafter it will be supported by our technical expertise.

Cloud 📶	CLOUD-BASED FUNCTIONALITY	Security 📶	BUILT-IN, SECURE ENCRYPTION	Mobility 📱	ENABLES MOBILE WORKING

Our connectivity solutions can be customised to the customer's unique requirements and include:

iLink Connectivity - Your Business' platform for convergence

Itec Integrate is committed to deliver high-quality fibre and licensed wireless connectivity solutions in a range of iLink service options focussed on servicing the enterprise, corporate multi-site, international, SME and SOHO businesses alike. iLink offers a reliable, high-speed connectivity platform for the convergence and management of the simplest to the most complex data, voice and IP based services.

Shared and Private APN - Connectivity anytime and anywhere

Ensure business continuity securely and cost-effectively by providing your workforce with a solution that allows for connectivity anytime and anywhere based on the mobile data, content allowance and confines set by your organisation.

APN

APN is short for **Access Point Name** which facilitates a secure gateway between Mobile networks and other computer networks as well as the public internet. An APN solution allows for multiple SIM cards across various mobile networks (Vodacom, MTN and Telkom), connecting to the Internet via the Itec network, utilising a shared data bundle and governed by a Hosted and/ Onsite Firewall that further enhances the management and security of your users and your organisation. **Itec APN solutions consist of two options:**
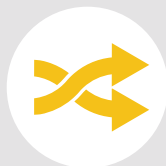

Shared APN
A **Shared APN**, allows for direct access to the internet and includes a Hosted Firewall that will allow for general limitations to be set by SIM/user.

Private APN
The **Private APN** solution will allow for the allocation of a unique Access Point Name, which is a unique identifier that allows mobile devices to connect to their organisation. This APN solution also offers Hosted or Onsite Firewall selection that will allow for customized rulesets and the option to have internet access routed over a current Itec Corporate Network (MPLS).

Cloud 📶 CLOUD-BASED FUNCTIONALITY   **Security** 📶 BUILT-IN, SECURE ENCRYPTION   **Mobility** 📱 ENABLES MOBILE WORKING

Make that call

Depending on your connectivity, business size, location and infrastructure, Itec will customise a voice solution that is service-based, reducing your investment in hardware. After assessing your communication needs, business challenges and existing systems we will propose either a small, medium or enterprise PABX solution that can be financed over 24, 36, 48 or 60 months.

We offer voice products from the MiCloud, MiVoice and MiContact Centre ranges

Mitel 6863 SIP Phone

This 2-Line SIP Phone with 2.75" graphical monochrome LCD display, programmable hard keys, and smaller desktop footprint is an ideal option for business environments that have light telephone use requirements.

Mitel 6865 SIP Phone

The Mitel 6865 SIP Phone offers exceptional value in a fully featured, expandable IP phone. It has eight programmable keys, XML capabilities, Expansion Module and native DHSG/EHS support and Gigabit throughput for PC connectivity.

Mitel 6867 SIP Phone

The Mitel 6867 SIP provides remarkable HD wideband audio and an enhanced speakerphone, a large colour LCD display, dual port GigE, six programmable soft keys, four context-sensitive system keys, native DHSG/EHS headset and Expansion Module support.

Mitel 6869 SIP Phone

The Mitel 6869 SIP Phone commands the desktop with its large 4.3" colour display, powerful crystal clear HD audio and 12 programmable soft keys. Dual Gigabit Ethernet ports, magnetic keyboard interface, native DHSG/EHS headset support, and choice of expansion modules.

M685 Expansion Module

The M685 features a colour LCD screen and 28 programmable keys, with the ability to scroll through three pages of programmed entries.

M680 Expansion Module

The M680 is compact, cost efficient, and provides 16 additional programmable keys with built-in LEDs.

K680 Detachable Magnetic Keyboard

The K680 Detachable Magnetic Keyboard magnetically attaches to the 6867 and 6869 models to allow easy and quick navigation through features and directories.

Wall-Mount Kit

All Mitel 6800 Series SIP phones can be wall-mounted safely and securely. The wall-mount kit has a two piece slide-and-lock design and includes a short Ethernet cable, making installation simple and efficient.

| Cloud | CLOUD-BASED FUNCTIONALITY | Security | BUILT-IN, SECURE ENCRYPTION | Mobility | ENABLES MOBILE WORKING |

MiVoice 6920 IP Phone

The MiVoice 6920 IP Phone is designed from the ground up for the enterprise user who requires an exceptional HD audio experience via its unique voice optimized handset. It offers a large colour LCD display, dual GigE, programmable personal keys and context-sensitive soft keys, support for both USB & Analog headsets.

MiVoice 6930 IP Phone

The MiVoice 6930 IP Phone commands the desktop with its large 4.3" colour display, powerful crystal clear HD audio through the voice optimised handset, programmable personal keys, Bluetooth 4.1 with Mobile Integration, mobile phone USB charging point and choice of expansion modules makes the 6930 the choice of power users.

MiVoice 6940 IP Phone

The MiVoice 6940 IP Phone is designed for executive users who demand a lot from their phone. The 6940 offers a large 7" touch display, powerful crystal clear HD audio through a unique cordless Bluetooth voice optimised handset and programmable personal keys. Mobile Integration, Dual Gigabit Ethernet ports and the full-duplex speakerphone ensure the 6940 delivers a robust, productivity-enhancing executive desktop communication tool.

Voicegate

Your business can enjoy all the functions and features of a traditional PBX without the need for landlines, at a rate you can afford.

Voicegate is a managed IP telephony system hosted in the cloud that enables PBX functions and features associated with traditional PBX solutions. Supported by various connectivity types, this cost-effective and scalable solution allows customers to further benefit from competitive call rates from our range of Voice over IP services that deliver both inbound and outbound voice traffic.

Mitel 6863 SIP Phone

This 2-Line SIP Phone with 2.75" graphical monochrome LCD display, programmable hard keys, and smaller desktop footprint is an ideal option for business environments that have light telephone use requirements.

Mitel 6865 SIP Phone

The Mitel 6865 SIP Phone offers exceptional value in a fully featured, expandable IP phone. It has eight programmable keys, XML capabilities, Expansion Module and native DHSG/EHS support and Gigabit throughput for PC connectivity.

Mitel 6867 SIP Phone

The Mitel 6867 SIP provides remarkable HD wideband audio and an enhanced speakerphone, a large colour LCD display, dual port GigE, six programmable soft keys, four context-sensitive system keys, native DHSG/EHS headset and Expansion Module support.

Mitel 6869 SIP Phone

The Mitel 6869 SIP Phone commands the desktop with its large 4.3" colour display, powerful crystal clear HD audio and 12 programmable soft keys. Dual Gigabit Ethernet ports, magnetic keyboard interface, native DHSG/EHS headset support, and choice of expansion modules.

SECURITY

Keep Your Company, Employees, Customers & Information Safe

COVID-19 has changed the way we look at access control. With new rules and regulations regarding company premises access control Itec has a wide range of products to assist you in ensuring the safety of each individual that need to gain access to your premises.

Sharing information is vital for a business. Customer details, the specifics of deals, competitive pricing, phone calls, emails and many other pieces of information are crucial to gaining and maintaining an edge over the competition. By analysing what is under threat in your business, it is easy to foster a security culture that doesn't inhibit your employees' productivity. Connect with a trusted partner like Itec, and hone your security culture while leaving the heavy lifting to us.

By deploying an effective voice & data platform, companies are able to expand into a variety of collaboration tools to make remote working seamless.
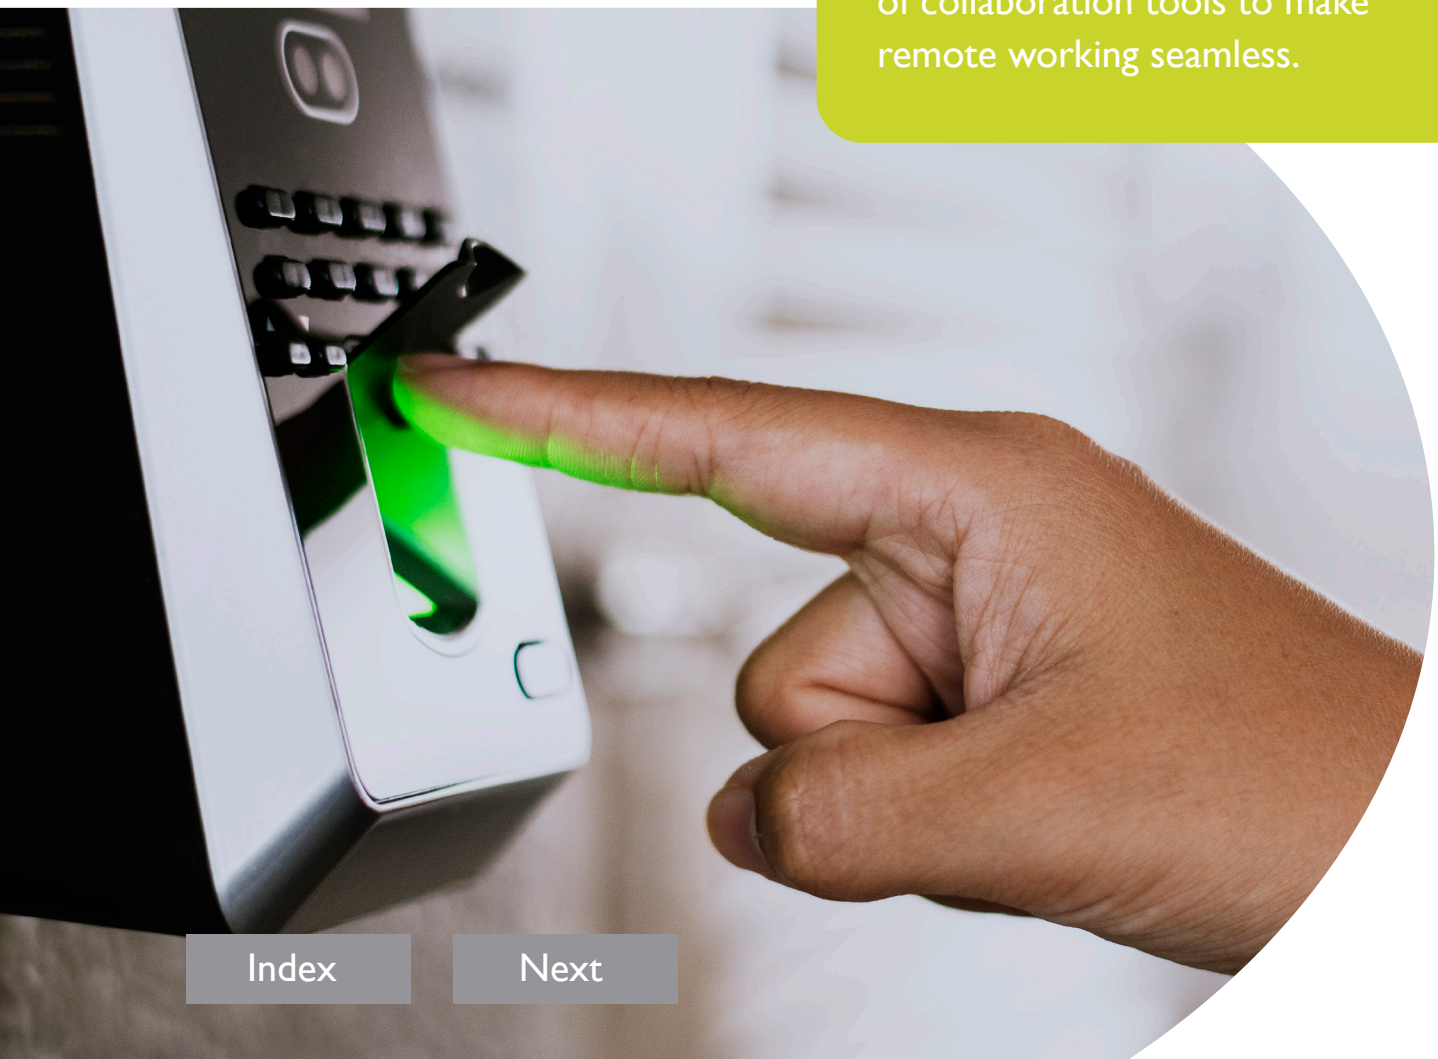

SECURITY - CCTV Range

PTZ Camera

The Smart PTZ Dome Camera series features HD imaging, smooth Pan/Tilt/Zoom, long range lenses and IR along with smart tracking functions to ensure the elimination of all blind spots within the camera's area of coverage.

Bullet Camera

Outdoor Bullet Cameras are a versatile solution for all of your security needs. They feature a wide range of viewing angles that capture images with high resolution. Most Bullet Cameras are equipped with an IR lamp, which facilitates night time recording.

Dome Camera

Dome Cameras are a versatile solution for all of your security needs, offering both indoor and outdoor options. They feature a wide range of viewing angles that capture images with high resolution. Most Bullet Cameras are equipped with an IR lamp, which facilitates night time recording.

Network Video Recorder

Meeting all bandwidth and storage utilisation requirements, the Smart Pro NVRs support recording of up to 12 MP camera resolution, Ultra High Definition (UHD) output up to 4K, up to 192 TB of storage capacity and H.265+ compression to increase storage space by 50-70%.

Access Control - Biometrics

Readers

Access control Readers use different technologies ranging from Biometric to Facial recognition, to perform a variety of functions. Readers can be used to perform tasks like granting access to doors, locking server cabinets and more, making them an ideal component in many access control systems.

Time & Attendance

Time and Attendance devices are perfect for company HR Managers of any small or medium sized business. These devices will work wonders in making your job easier while also making it possible to more closely monitor employee time, thereby saving your company time and money.

Smart Locks

A new generation of Smart Lock solutions have hit the market. This revolutionary lock offers more than just smart looks, it delivers the ultimate combination of security, convenience and access flexibility in a single lock.

Turnstiles

Turnstiles are compact and cost effective entrance solutions. Designing for smooth and silent operation, reducing power consumption, wear and tear. It is suitable for areas with high traffic.

SECURITY - Access Control: Facial Recognition

Cloud 📶 CLOUD-BASED FUNCTIONALITY   Mobility 📱 ENABLES MOBILE WORKING

Value Series

Value Face Terminals offer limited storage capacity for facial images, but complete access control and time attendance functions. They can be very suitable and cost-effective for medium and small companies and retail establishments.

Pro Series

Pro Series Face Terminals offer adequate storage capacity for facial images and complete access control and time attendance functions, giving this series the advantages of high cost-effectiveness and high adaptability to different application scenarios.

Ultra Series

With a large storage capacity for facial images, high performance and comprehensive access control and time attendance functions, the Ultra Series Face Terminals offer users and clients an excellent user experience.

Facial Recognition Module for Turnstile

The Face Recognition Modules for Turnstile can easily integrate with turnstiles to provide the user with a complete access solution. The integrated terminal-turnstile solution is particularly useful for commercial buildings, banks and so on.

Access Control - Thermal Solutions

2617B Bullet Camera

The Bullet Camera is a non-contact, long-range and high accuracy product. It is reducing risks of cross-infection. It has an efficient auto alarm triggering that greatly reduces labour costs.

TP21 Handheld Thermal Camera

This product is designed for the detection of skin-surface temperatures to achieve rapid and safe preliminary screening in public areas with high efficiency in a multitude of scenarios. Temperature measurement range: 30°C to 45°C. Temperature measurement accuracy: ±0.5°C

TP31 Handheld Thermal Camera

The Handheld Thermal Camera, specially designed for body temperature measurement. It's equipped with a 160×120 resolution thermal detector. It helps to quickly detect fever.
Metal Detector

This product is designed for the detection of skin-surface temperatures to achieve rapid and safe preliminary screening in public areas with high efficiency in a multitude of scenarios. AI face detection, multi-target detection. Alarm triggered when the temperature is over the threshold.

Facial Recognition and Temperature Screening

Long-term temperature screening with access control for building related projects. Centralised management for access control with temperature records. Flexible deployment, suitable for various scenarios.

SECURITY - Additions

Electric Fence

Nemtek has advanced security solutions and have identified the need for secure perimeter protection, combined with aesthetically pleasing designs that do not compromise on the effectiveness and the performance of the electric fence. Modulus bracket and post systems are just some of the trusted solutions which ensure that the security electric fencing products are visually appealing without compromising on their effectiveness and reliability.

Boom Gate / Gate Motors

Your entrance gate is what stands between you and the outside world. It's your first line of defence against criminals. Make sure that it's fitted with the very best. CENTURION's range of sliding gate motors has been designed to provide the ultimate in security and convenience. We offer a number of road security options in the form of vehicle barriers, from effective boom gate systems to high-level security bollard solutions.

Alarm Systems

Paradox security solutions offers a wide range of respectable security solutions. Wide range of expandable devices - Paradox Evo192, Magellan MG5050, Magellan MG6250 and Spectra SP6000 alarm control panels. When it comes to wireless alarm systems you have found the right one. All panels are fully expandable to give the end user flexibility and personal customisation.

CLOUD SERVICES

Own the information, not the infrastructure

Reliable, cost-effective and scalable on demand delivery of IT solutions and resources negating the need for buying, owning and maintaining physical servers and data services is suitable for organisations and industries of all types and sizes. Cloud services and solutions applicable to Infrastructure, Platform or Software as a Service, the Itec solutions consist of and can include a combination of architecting, designing, and building bespoke solutions based on your business' specific cloud hosting requirements.

Allow Itec to help you plan and implement your cloud strategy with our innovative range of solutions.

Cloud | CLOUD-BASED FUNCTIONALITY   Mobility | ENABLES MOBILE WORKING
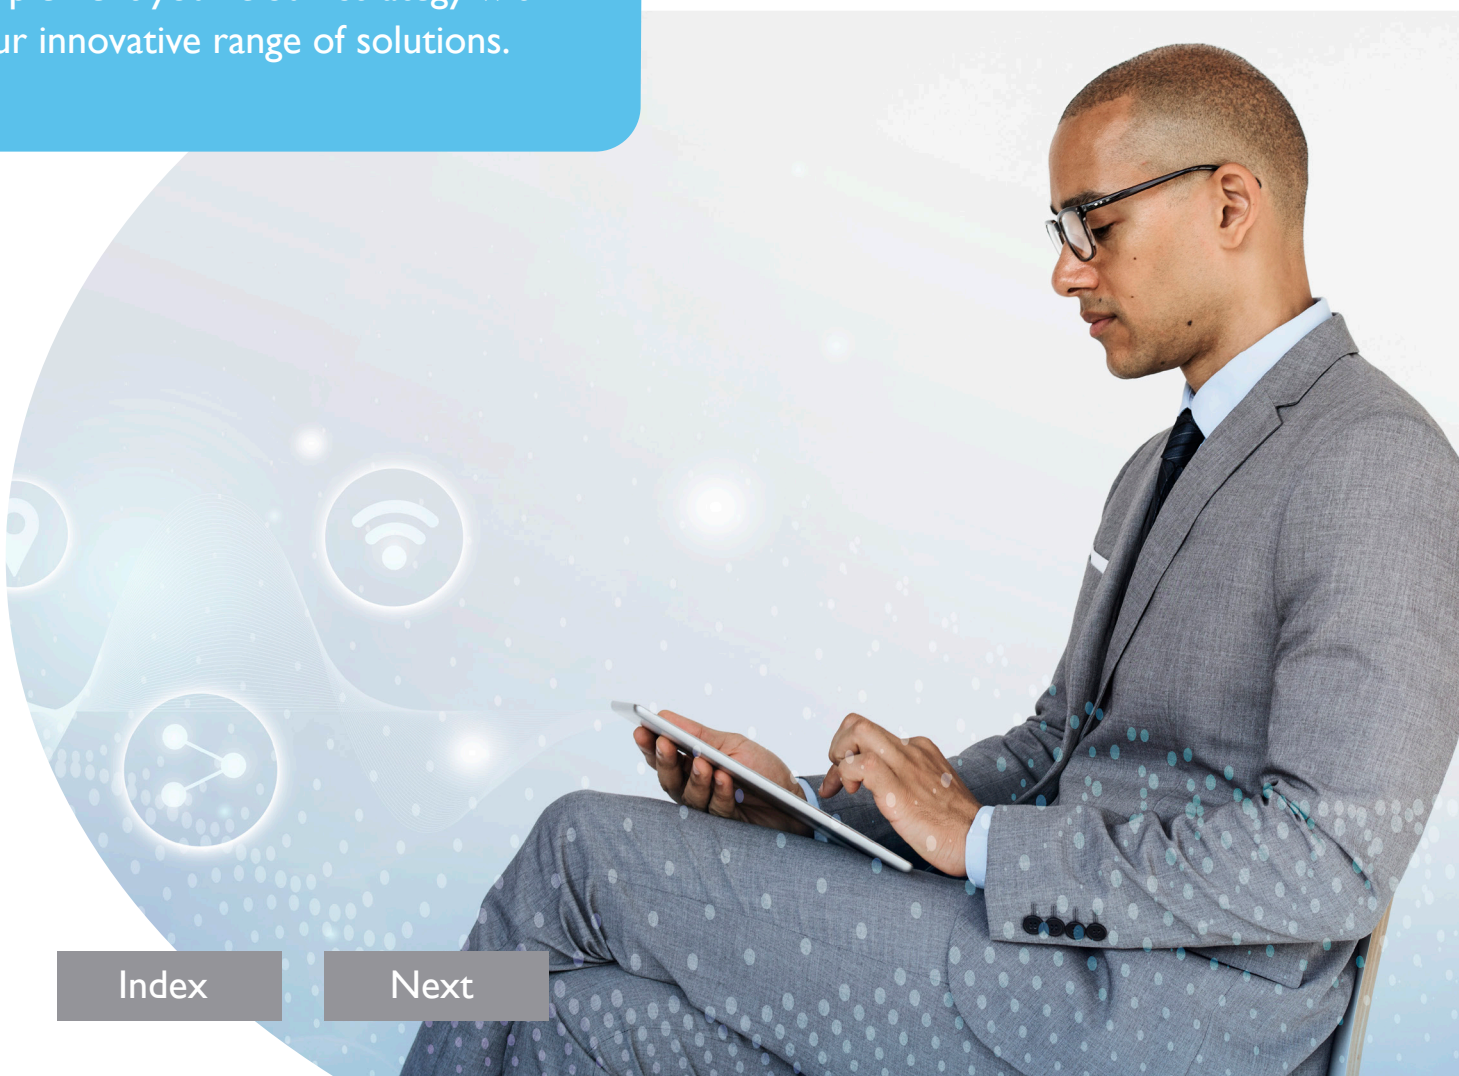

Firewall Hosting

100% Cloud Managed IT

Itec offers cloud managed edge, branch, and enterprise-class campus IT solutions to bring simplicity to organisations of every size. With wireless, switching, SD-WAN, security, communications, mobility management and security cameras, all centrally managed from the cloud, we give IT administrators visibility and control, without the cost and complexity of traditional architectures.

Cloud Managed APs

Access points are built from the highest grade components and carefully optimised for a seamless user experience enabling faster connections, greater user capacity, more coverage, and fewer support calls.

- BYOD policies
- Application traffic shaping guest access
- Enterprise security
- WIDS / WIPS Location analytics

Security Appliances

Security Appliances can be remotely deployed in minutes using zero-touch cloud provisioning. Security settings are simply synchronised across thousands of sites using templates. AutoVPN technology securely connects branches in 3 clicks, through a web-based dashboard.

- Zero-touch site to site VPN
- WAN optimisation
- NG firewall
- Intrusion detection
- Content filtering

Switches

Access and aggregation layer switches provide the backbone for networks of every size, combining secure, scalable, robust performance with an intuitive management experience.

- Voice and video QoS
- Layer 7 app visibility
- Virtual stacking
- PoE / PoE+ on all ports
- Remote packet capture, cable testing

Virtual Service Hosting

Enable your business' cloud strategy with Virtual Machines that are secure, stable and at high availability.
.

Domain Hosting

Itec offers domain hosting. A domain host is an internet service that manages your domain name, such as, example.com. Domain hosts use Domain Name System (DNS) records to connect your domain name with email, websites, and other web services.

Traditional security can't keep up with the constantly changing threat landscape. Sophos solutions deliver the world's best protection, innovating new solutions to continuously improve your cybersecurity.

Endpoint Protection
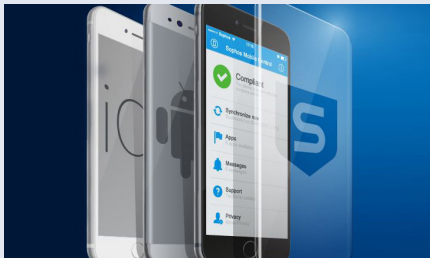

Sophos Intercept X is the world's best endpoint protection, combining ransomware protection, deep learning malware detection, exploit prevention, EDR, and more in a single solution

Network Protection

Proven protection for your network – simpler, faster, better. Making it easy to extend your secure network to employees anywhere. Also provides security, visibility, and control for all your devices, regardless of the access point. Easy to deploy and manage.

Cloud Protection

Optix delivers the continuous analysis and visibility organisations need to detect, respond, and prevent security and compliance gaps while finding ways to optimise cloud spend.
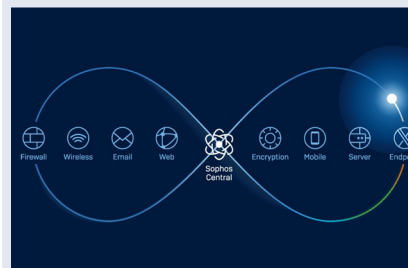

Server Protection

Sophos employs a comprehensive defense-in-depth approach to server protection. Intercept X Advanced for Server prevents attacks from reaching the server, detects attacks before they run, and cleans up damage in case of a breach.
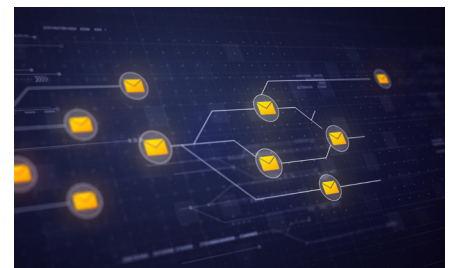

Central Management

Sophos Central helps you manage security policies and administer multiple products from a single web interface. No management servers to deploy or install, your endpoints, servers, appliances, and devices will check in directly with Sophos Central.

Email Protection

Sophos Email is built to integrate seamlessly with popular email platforms, Sophos Email is engineered to keep businesses safe from email threats, simply stopping spam, phishing, malware, and data loss.

DOCUMENT MANAGEMENT

Streamline Your Printing Operations

After assessing your existing print environment, we build a solution to best meet all your business needs. Upgrading and consolidating your print hardware, while considering the software and services that best enable employee mobility, data security, and efficient, streamlined document management.

Our advanced software solutions integrate with your printing hardware and allows us to assess and guide your business. Itec provides quarterly reports to make business continuity as efficient and cost effective as possible. Itec is a Managed Print Service provider that strives to implement secure and efficient solutions to ensure business continuity.

There are great efficiencies to be found if you treat your data smartly, deciding what is relevant now and what should be archived.

Cloud — CLOUD-BASED FUNCTIONALITY   **Security** — BUILT-IN, SECURE ENCRYPTION   **Mobility** — ENABLES MOBILE WORKING

A4 Mono Single Function

Up to 57 ppm

The Lexmark Mono Single Function range of devices is ideal for midsize to large workgroups offering rich features including multiple finishing options.

A4 Mono MFP

Up to 57 ppm

The A4 Mono MFP range of devices brings powerful productivity tools, cost-saving workflow solutions and a large, intuitive colour touchscreen interface for amazingly simple access to a rich range of features. This includes duplex scanning, advanced copying and easy user authorisation for enhanced security.

A4 Colour Single Function

Up to 47 ppm

The Lexmark Colour Laser Printers are machines that combine the functions of a workgroup printer with the simplicity of a personal output device. They have integrated advanced security settings and can print up to 47 pages per minute in both black and white, as well as colour. They also come with the function of duplex (2-sided) printing.

A4 Colour MFP

Up to 47 ppm

For high-quality, cost-effective colour that never slows you down, the Itec colour multifunction printer combines, standard wireless connectivity, web browser and touch-and-swipe control convenience in compact dimensions to fit any office space. Simple networking for mixed multifunction printing and desktop environments.

A3 Mono MFP

Up to 95 ppm

Offering a smart combination of features, technologies and investment for a competitive edge in business production printing. A modular system starting with entry-level hardware costs plus it features energy star awarded green technology.

A3 Colour MFP

Up to 45 ppm

The Itec A3 Colour MFP range offers high-speed output printing and scanning to help improve your productivity. It also features advanced system integration options and a built-in print system with a "touch and swipe" interface for customisable operation.

Production Printers

Up to 136 ppm

Itec's Production Printing range adds power, performance and simplicity to any production print application -- up to 136 ppm print/ copy output, real-time image density and colour density control sensors, and digital colour imaging to rival offset printers at a fraction of the cost.

Cloud CLOUD-BASED FUNCTIONALITY   **Security** BUILT-IN, SECURE ENCRYPTION   **Mobility** ENABLES MOBILE WORKING

Print Director

Manage printer and copy usage with Print Director. Print Director software has all the features to help you easily optimise printer access and track printer and copy usage throughout your organisation. An excellent reporting system makes internal billing a breeze.

SyncPLUS

Itec SyncPLUS is an online monitoring health and status monitoring solution. It reduces the need for user intervention and boosts system uptime by automating a number of key processes and tasks for your print fleet.

doc-IT

doc-IT Transforming the management, security and sharing of information. By organising and processing content based on what it is rather than where it resides.

M-Files

M-Files® is a powerful, metadata-powered enterprise content management (ECM) and document management solution that solves the problems of managing, finding, and tracking information in companies of all sizes.

Document Navigator

Document Navigator Offering intelligent document capture, processing and delivery. Itec Document Navigator provides seamless electronic workflows for paper-based documents.

Chrometa

Chrometa is time tracking software that automatically tracks applications as you work across all connected devices. The software provides powerful reporting for business intelligence.

Microsoft 365

Microsoft 365 is cloud-based productivity, hosted by Microsoft. At its heart is Microsoft 365 itself - the familiar, rich Microsoft applications customers use and love - now offered as a cloud service, so its always up to date.

Microsoft 365   M-Files   ITEC SyncPLUS   Itec Cost Management Print Director   doc-IT electronic document solutions   DOCUMENT NAVIGATOR   Chrometa

MOBILITY SERVICES

Mobility is one of the most powerful new tools of the 21st century.

Employees can work anywhere, customers can engage where they please and information can now flow freely across the organisation, bridging the walls of silos and bringing immediacy to processes. Not just about smartphones and tablets, mobility represents how technology makes information accessible to your employees and clients.

The technologically enabled and optimised workplace (Intelligent Workplace) considers the goal of organisational efficiency, which is made up of convenience, accessibility, personal safety, remote and physical presence or in most scenarios a hybrid of both. Our technology will not only enable but simplify remote working. Workforce optimisation through mobility provides organisations the opportunity to improve efficiency while driving costs down. Workforce optimisation encompasses work order management, data management and productivity management. Scheduling software provides the foundation for automating these operations, while electronic forms, mobile printing, GPS connectivity and other technology tools can increase the benefits and drive productivity.

To support these mobile workforce solutions your technology needs will change. Your business will require solutions that enable easy data sharing between platforms. Whether it be connectivity, unified communications, cloud, security or software, Itec has solutions to fit every part of your business while encouraging ease and integration to effectively equip your workforce for mobility. By partnering with Itec, your employees could take conference calls on the road, have collaboration meetings by sharing documents securely and ensure you are paid on time because the invoice was issued and received without fuss. All of this while you are still in control of where your data is, who has ownership, and what might happen with it.

Transform your workplace through mobility.

- Technology Removes Boundaries for Increased Collaboration
- Improves Flexibility
- Enhance Communication while Reducing Overheads
- Tailored User Experience
- Attracts Talent and Reduces Churn
- Increases Revenue
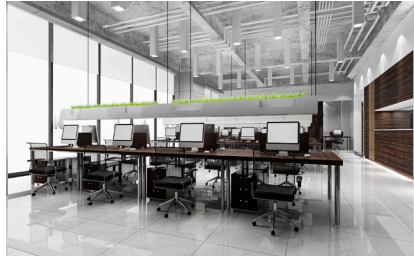

iWorkspace RS (Resource Scheduler)

Hoteling and Mobile Workforce

A powerful combination of improved employee productivity and real estate cost savings. Whether your corporate culture includes mobile employees or you're introducing an agile work strategy, the key to success lies in user-friendly tools and a focus on employee change management.

Desk Booking

This is ideal for a flexible workplace strategy that fits the needs of your employees. It provides critical controls for the allocation and reservation of workstations, allowing for the safe return of employees to the workplace.

Room Scheduling

Schedule the rooms, resources and services you need, quickly and easily. Better manage last minute changes, keeping your cool with information at the ready. Use an intuitive interface and configurable workflows.

iWorkspace Sensors

Occupancy Sensors

Turn space challenges into opportunities with real-time objective data that allows you to identify, plan and deliver the ideal workplace. Sensor data reveals actionable insights that can improve employee productivity.

.

Environmental Sensors

They monitor temperature, humidity, light, noise, air pressure, and air quality in a workspace. The platform unifies occupancy and environmental data to provide organisations with the information needed to make educated and cost-effective decisions.

FINANCIAL SERVICES

We don't believe in one-size-fits-all financing. It's why our first job is to listen. Get to know you, your business and your goals. Because your technology goals deserve a perfectly tailored solution.

Our rental finance specifically designed and available for any Itec product or service is widely regarded as the best in the industry due to its flexibility, affordability and ease of access. We provide relationship-centric, personalised service combined with years of experience to get you exactly what you need for your business.

The technology industry is ever-changing and rapidly evolving. We continuously focus on providing your business with simple and innovative finance and rental solutions that help you achieve the most from your business investments. We are invested in creating a seamless customer experience.

From security to connectivity, cloud, software and unified communications, our specialists devise solutions that adapt to your rapidly changing technology requirements, allowing your business to grow and succeed with the right technology and finance solutions. Along with providing options for hardware rentals, we also offer comprehensive programs for financing and renting of software solutions.
