# MiVoice Office Web Application

Experience a Real-Time True Collaboration Experience

Key Benefits

- Remove the cost of flipping between multiple applications to deliver messaging, voice, presence and team collaboration
- Collaborate in the real world from anywhere with the same set of tools & a consistent look and feel
- Scale up and down to fit your business needs with a dynamic cloud infrastructure
- Designed specifically for the Small to Medium Business

Ensuring your office based or remote working employees can collaborate more easily and effectively, no matter where they are or how they choose to work - is more essential than ever.

## Everything you need in a single location

Organizations can enhance the speed & quality of decision making through its workforce by ensuring they have everything they require to seamlessly connect, communicate and collaborate as a team in real time. For a true collaboration experience, today's workforce needs a single application that lets them chat, talk and collaborate in real-time as if they were in the same room. MiVoice Office Web Application delivers this & ensures every interaction is as efficient & productive as possible.

Use it via the Web or as a Desktop App

You choose how you want to utilize MiVoice Office Web Application - via a web browser or as a PC/MAC desktop based Progressive Web Application to emulate an installable App. Both featuring a modern design that is easy to understand and streamlined workflows that deliver better user experiences.

Desktop App

Web Browser

Key Functionality

- Take / receive calls – through a Softphone or CTI control of your desk phone
- Manage Presence & Availability
- Manage Chat Sessions – 1:1, Group or Streams
- Access to Call History
- Customize your home screen by adding favorites
- Run from a Web Browser or as a Progressive Web App on your Desktop
- File Sharing
- Integrated access experience of MiTeam Meetings (separate subscription required)

Streams – Topic Based Chat

Virtual workspaces where teams can discuss topics, share files/content and not have to search through multiple locations, emails or applications to find the information they need.

Bridge the communications gap

MiVoice Office Web Application delivers integrated access to MiTeam Meetings. A multi-party video solution designed for those who want to schedule future video conferences or alternatively escalate from a chat to a video call in seconds (separate subscription required).
