

VoiceGate 2.0 - The Future is Calling

Your business can enjoy all the functions and features of a traditional PBX without the need for landlines, at a rate you can afford.

Why VoiceGate 2.0?

- Cost effective solution
- Allows for mobility
- Easy to deploy and maintain
- Scalable solution
- Handsets supported by reputable brands
- Allows for remote support
- Keep your number
- User personalisation
- Savings on call costs
- Low investment costs

Overview

Voicegate 2.0 is a managed IP telephony system hosted in the cloud that enables PBX functions and features associated with traditional PBX solutions.

Supported by various connectivity types, this cost effective and scalable solution allows customers to further benefit from competitive call rates from our range of Voice over IP services that delivers both inbound and outbound voice traffic.

How it works
