

ENGINEERING ACCESS CONTROL

Manufacturers and suppliers of vehicle and pedestrian access control equipment, high security and anti-terror security products.

Boomgate Systems was established in 1998, all our products are locally manufactured.

Over the past 21 years, the company has developed an integrated design and production system that allows complete control over orders, manufacture, testing and dispatch of all our products.

SERVICES

SCORPION™ HIGH SECURITY RAPID SPIKE BARRIER

The Scorpion™ High Security Rapid Spike Barrier has a control panel that allows two barriers to interlock, creating a trap barrier. The spikes stay up even when the boom arm is forced open and it can be used for reversible lanes. An optional extra is a high-security lock with a tamper proof door.

WARRIOR HYDRAULIC BOLLARDS

Boomgate Systems Warrior™ Road Blockers have been installed at key national points and comprise of single or three-phase hydraulic pump with a single acting hydraulic cylinder. They have ultra heavy-duty industrial bearings for the pivot mechanism with a hand pump to manually raise the lever.

WARRIOR ROAD BLOCKER

The Hydraulic Bollard can be used to control vehicles in either one way or two-way configurations and is specifically designed to interface with our extensive range of access control security systems, remote manned operation or open/close vehicle loop detectors.
