NEXT **GENERATION FIREWALL (NGFW)**

NGFWs protect any edge at any scale.

Fortinet is the pioneer of secure networking, delivering flawless convergence that can scale to any location: remote office, branch, campus, data centre and cloud. It provides deep visibility and security in a variety of form factors, including container firewalls, virtual firewalls, and appliances.

Why Fortinet's NGFWs?

AI-POWERED SECURITY

Protect your branch, campus, co-location, data centre & cloud with features that scale to any environment.

DEEP VISIBILITY

See applications, users & devices, even when encrypted, to detect and prevent threats.

MACHINE LEARNING

Build operational efficiencies into your environment and support overburdened IT teams.

SECURITY PROCESSOR UNITS

FortiGate ties key functions, such as TLS 1.3 decryption, IPSec, and IDS/IPS, to specialised ASICs so that you deliver optimal, secure experiences to stakeholders.

FORTICARE

Per-device support services provide access to over 1,400 experts and ensure efficient and effective operations and maintenance of Fortinet capabilities.

NETWORK CONVERGENCE

Connect and protect any edge at any scale with fully integrated networking capabilities, such as SD-Branch, SD-WAN & 5G.

Itec Security

Protect your company, employees, customers & confidential information from anywhere.
