

## SECURE SD-WAN

Fortinet Secure SD-WAN  
Transforms and Secures WAN.

Fast, scalable, and flexible Secure SD-WAN for  
cloud-first, security-sensitive, and global enterprises.

### Why Fortinet's Secure SD-WAN?

#### APPLICATION RESILIENCE

Ensures highest level of application availability and performance over any WAN transport.

#### INTEGRATED ADVANCED SECURITY

Converges the most advanced NGFW and routing to deliver consistent security on- and off-network.

#### SCALABLE, HIGH PERFORMANCE

Transforms and secures SD-WAN at large scale with no performance impact thanks to the industry's only SD-WAN ASIC.

#### MULTI-CLOUD ON-RAMP

Enables secure, fast connectivity and high performance to, in, and between cloud applications.

#### ZERO-TOUCH PROVISIONING

Enables large scale, faster deployment of Secure SD-WAN.

#### CENTRALISED ORCHESTRATION

Centrally manages deployments, configurations, and on-going operations with complete visibility, analytics and reporting.

#### Itec Security

Protect your company, employees, customers & confidential information from anywhere.

#### MANAGED BUSINESS SERVICES
