**SPOTICA**

# SPOTICA

## Industry Best-Practice Cyber Risk Management

Spotica is a "CISO in a box". It uses a task flow engine and intuitive drag-n-drop interface to guide every user on what to do next, every step of the way.

## WHY USE SPOTICA?

Unlike other rudimentary systems of record, Spotica is one of the only cyber management systems to offer integrated step-by-step advisories in its digital CISO module.

An intuitive, easy to use cloud-based platform with specialised modules for:

- Cyber Security
- Data Privacy
- 3rd Party Supplier Security, and more.

With the Spotica platform, in a matter of hours you get:

- A prioritised list of controls to implement per asset, with guidance on how to implement them.
- Detailed dashboards of your 3rd party supplier risk.
- Decision support around which risks to accept.
- Guidance to correct inadequate controls.
- Real-time insights on high value assets, risk mitigation actions, and much more…

## Risk Management Services

Spotica sets out a best-practice approach to cyber risk management that can be adopted by all businesses, large and small.

De-risk your business.
Amazingly simple.

# WHY **ITEC IT?**

## DRAG-AND-DROP **RISK MANAGEMENT**

De-risk your digital transformation

- Protects against vulnerabilities from digital transformation that emerge faster than you can address.
- Ensures that your business is doing enough of the correct activities required for digital security.
- Aligns with the best security frameworks and standards for your business, from a wide and complex range of options.
- Eliminates the need to stretch already strained resource capacity by bringing scarce security skills in-house.
- Automates a compliance and risk management process that is often done manually and not customised to unique business requirements.

## Your Digital Cybersecurity Aid

### ADVANCED KNOWLEDGE ENGINE

- Digital & easy to use.
- Integrated & comprehensive.
- Affordable & adds business value.

### IMPROVES BUSINESS INTELLIGENCE

- Make better decisions and alter tactics with real-time analysis.
- Track actions and progress on a single page dashboard.
- Gain visibility into the state of your ransomware protection.

## Amazingly Simple

**1 DRAG-AND-DROP**
Spotica is pre-configured with the comprehensive sets of industry specific assets, threats and controls.

**2 AUTOMATICALLY GENERATES**
The Spotica Knowledge engine algorithms create all the complex artifacts required to understand and reduce your risk.

**3 FLOW WIZARD**
The advanced workflow engine drives timeous and accurate completion of all tasks through a highly intuitive user interface.
