

La Petite Ferme Enhances Security With **Cutting-Edge Surveillance Technology**

La Petite Ferme, nestled in the heart of Franschhoek, has successfully installed advanced security solutions to ensure the safety and well-being of its guests and residents. In collaboration with Itec Cape Town, the wine farm has fortified its commitment to creating a secure haven in one of the most scenic towns in the Western Cape.

La Petite Ferme Case Study

Situated in the historic town of Franschhoek, La Petite Ferme is a renowned wine farm offering award-winning cuisine, wine experiences, and accommodation. Franschhoek, celebrated for its picturesque charm and captivating landscapes, saw a concerning 15% increase in security incidents in 2022, which posed a huge risk to residents and businesses in the area. Recognising the importance of safeguarding their premises without compromising the aesthetic appeal of the wine farm, La Petite Ferme consulted with Itec Cape Town to develop a tailored solution.

Itec Cape Town has built a reputation based on its meticulous approach, and

collaborated closely with La Petite Ferme to design and install a sophisticated security solution which would suit the needs of the wine farm and its surroundings.

A Time and Attendance and CCTV solution was suggested, including state-of-the-art Hikvision Dome Cameras, Ubiquiti UISP airMAX GigaBeam, and Hikvision's AcuSense technology, among other cutting-edge features.

"Our methodology is not to sell products, but rather to **understand where our clients' vulnerabilities lie** and what technology is best suited for them. We conduct a thorough site

assessment, identify blind spots, and offer a full solution catered specifically to the unique needs of our clients," says Linzy Green, Corporate Account Manager at Itec Cape Town.

The solution implemented by Itec Cape Town provided La Petite Ferme with an invisible fence equipped with technology that alerts the control room, ensuring real-time response to potential security threats.

In addition to perimeter security, cameras were strategically installed in the kitchen to prevent internal theft, enhancing the overall safety on premises.

We now understand that there is no need for anyone in Franschhoek to experience crime. There are preventative measures that anyone can put in place to ensure their business and people are physically safe. I definitely sleep better at night having peace of mind that our guests are safe while on our property,

Riaan Kruger, GM La Petite Ferme.

Various obstacles were encountered during installation, one being the hard and rocky ground on site which extended the timeline for completion. Despite this, Itec Cape Town navigated the installation seamlessly, working alongside other construction teams on-site to swiftly overcome these challenges and successfully complete the best installation possible. The project concluded in just

two weeks, showcasing Itec Cape Town’s commitment to delivering effective and non-invasive security solutions.

“We now understand that there is no need for anyone in Franschhoek to experience crime. There are preventative measures that anyone can put in place to ensure their business and people are physically safe. **I definitely sleep better at night having peace of mind that our**

guests are safe while on our property,” says Riaan Kruger, GM of La Petite Ferme.

By investing in cutting-edge surveillance technology, La Petite Ferme aligns with the mission of Itec Cape Town to create a safer Franschhoek and emphasises the importance of security equipment as a business investment.
