PRINT & CONTROL ROOM

Digital In-House Printing & Analytics-Driven Security Control Room
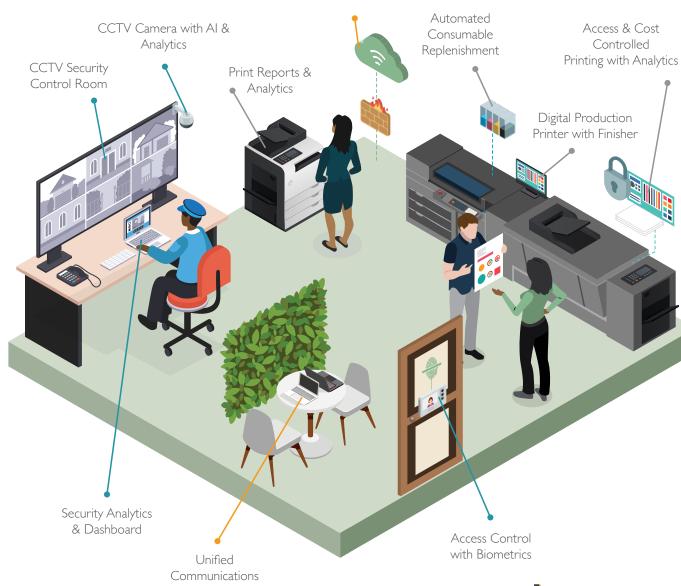

Secure WiFi

The legal industry continues to rely on hard copy documents, even as they make the journey to digital transformation. A hybrid approach to digital and hard copy information management, access, and archival reduces costs and assigns client billing easily and accurately. Due to the sensitive nature of the business, both on-site security and cybersecurity are important considerations, enabled by AI and analytics-driven security solutions.

Itec equips the security control room with monitors, CCTV feed, biometric access control, and a security analytics dashboard.

Access & Cost Controlled digital Printing with Analytics and reporting, production and multifunctional devices, automated consumable replenishment and proactive technical service create a central printing hub that is networked throughout the builidng.

Secure WiFi, digital displays and a Unified Communications application connect this service centre with the rest of the firm for easy collaboration and seamless operations.
