THE COST
Of Downtime

An interactive tool to calculate potential downtime costs

ITEC

Enter your details below to find out what the potential cost of one minute of downtime could be for your business.

An outage or disruption in your network or communications infrastructure could lead to downtime that could have a dramatic or catastrophic effect on your business and revenue stream. You could face the potential costs of lower employee productivity, lost opportunities cost, security and compliance sanctions or fines. Or you could face customer dissatisfaction and complaints as well as brand damage.

Use this infographic to calculate the cost of just one minute of downtime. The results will surprise you!

Human Time & Data (Hours)
