# HALL / AUDITORIUM

Technology & Comfort in a State-of-the-Art Educational Institution

Any Educational Institution Hall requires user-friendly audio-visual equipment and wirelessly connected interactive presentation tools for effective communication, messaging, and stage performances. An easy-to-navigate technical set-up and digital room controls make for a state-of-the-art, comfortable venue.

Itec provides audio-visual and communications solutions, including microphones and speakers, delivering clear and amplified sound. Additionally, we offer smart interactive screens, WiFi-connected projectors, and wireless displays for dynamic and engaging content sharing. A PBX-integrated PA system enables effective school-wide communication, while firewall-secured WiFi provides reliable internet connectivity. A room booking system streamlines scheduling with temperature and light controls to optimise the environment. CCTV cameras with microphones enhance security by providing visual and audio surveillance.

- Unified Communications
- Document Management
- Security & Business Intelligence
