IT & PRINT ROOM

Cost-Effective, Secure & Efficient Print & Communications

Printed educational materials and a well-managed campus-wide unified communications system are essential to keep information flowing effectively in an academic environment. Print, print security and management, efficient, integrated communications and robust security contribute to transparent, cost-effective and efficient back-end administrative processes.

With Itec's extensive experience in document management, print rooms can enjoy cost-controlled production printing with finishing options, forms overlay printing, and automated consumable replenishment that streamline print operations and reduce waste. Print security on the network ensures the confidentiality of sensitive documents. A secure, well-integrated unified communications system empowers the IT department to facilitate seamless, secure communication and collaboration with firewall-secure WiFi, PBX softphones, and wireless displays. Additionally, robust security measures, such as CCTV cameras and access control, contribute to a safe and monitored environment throughout the campus.
