Toner
Replenishment Tips

Get the most out of your toner!

01.

NEAR EMPTY ISN'T EMPTY!

Do not replace the toner as soon as the message "Toner Almost/Near Empty" appears. At this point there is still about 25% toner left for use.

02.

DON'T SHAKE THE TONER

Avoid removing and shaking the toner as this will affect your toner replenishment settings that alert Itec of your toner levels.

03.

DON'T SWITCH TONER BETWEEN DEVICES

Do not remove toner from one device to place into another as this will have a negative effect on toner replenishment alerts sent to Itec.

04.

ONLY REPLACE EMPTY TONER

Only replace toner once the machine indicates "Toner Empty". This will ensure you have depleted the full toner cartridge for optimum use.
