

PRINT DIRECTOR PRO

1

Secure Document Release

Ensure that sensitive documents are only released when the authorised user is present, preventing unauthorised access and improving document security.

2

Follow-Me Print

Print from any device or printer within your network, and retrieve your print jobs from any connected printer, streamlining workflow and reducing waste.

3

Enhanced Document Security via Encryption

Encrypt documents to protect confidential information, ensuring that your business meets compliance standards while safeguarding sensitive data.

4

Active Directory Synchronisation

Automatically sync with your organisations Active Directory to ensure accurate user permissions and simplify user management across your entire network.

5

Driver and Queue Management

Simplify printer driver installation and management, as well as optimise print queues, ensuring a smooth and error-free printing experience for all users.

6

Comprehensive Reports

Track usage across users, departments, and devices with clear, actionable reports that help cut waste and drive smarter decisions.

7

Cost Saving Rules & Routing

Apply rules like duplex or B&W printing and route jobs to cost-efficient devices — cutting costs without disrupting workflow.

8

Audit Trail

Keep full visibility with a detailed print audit trail that supports accountability, compliance, and internal reviews.

9

Print/Copy & Telephone Cost Disbursements

Allocate print, copy, and phone costs to clients or projects with ease — ensuring accurate billing and transparent records.

10

Integrates with Legal Practice Software

Sync seamlessly with legal billing tools so client and matter codes update automatically — no doublehandling required.
