

# Benefits of Print Director Capture

## SINGLE SIGN ON

Access cloud applications and company workflows with a single secure login. No need to re-enter credentials.

## AUTHENTICATION

Use your existing Print Director credentials to seamlessly authenticate for copying, printing and scanning.

## PRINT FROM CLOUD

Print documents from cloud storage or workflow system at the device, with costs accurately tracked to the user.

## CAPTURE TO WORKFLOW

Scan hardcopy documents into existing digital workflows with full traceability, optional metadata tagging. No OCR required.

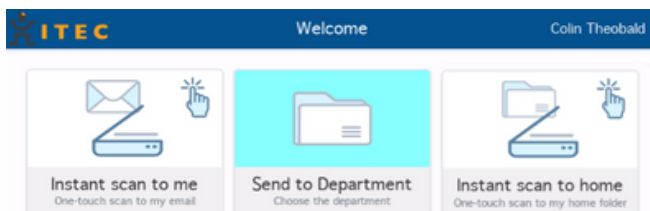

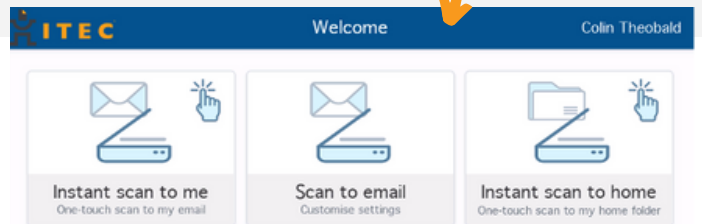

## PD Workflow with Standard Workflows

SCAN TO EMAIL VIA PD SERVER WITH PRINT DIRECTOR EMAIL INFRASTRUCTURE

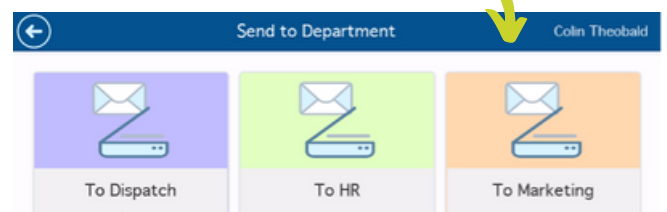

- Supports sending via O365 API (MS Graph / OAUTH2).
- Regular SMTP.
- Email send logging.
- One-touch scan to ME: Scan to user's email address with a single touch.
- Scan-to-Email with custom scan settings (resolution, file format etc.).
- Pre-defined one-touch scan to emails can be created.  
e.g. Scan-to-Manager or Scan-to-Dept etc.

### SCAN TO FOLDER

- Supports scanning to any folder accessible to the PDServer.
- Supports scanning to users' Home Folder.  
e.g. C:\ScanStorage\Users\JohnSmith
- Supports including variables in scan file name.  
e.g. User account name, account or matter code
- Support one-touch scan targets.

Grouping of workflows into folders

Customisable workflow box colours

# Other Recent New Functionality

- New range of Lexmark models supported, like CX95x, MX95x, XC9525, XC9535
- Block possibility of bypassing PD when printing to Lexmark (similar to Itec's 'Print Without Authentication' restriction).
- Serial number change alert emails.
- Meter reading and PD usage reconciliation report.
- Support for more than one card per user.
- Support for fingerprint reader login on Lexmark and Itec devices.

- Date-limited Rule assignments or unassignment.
- Rule assignments based on Active Directory Group or Entra ID Group.
- Itec device's auto-initialisation, detects when authentication or other settings (like Print Without Authentication) have been changed on the device by a technician, and PD will reset them. These changes are logged and can be reported on.
- Hosted PBX support: BiCom and VoiceGate.
- Itec device's screen savers can be configured in PD and auto-updated on all devices automatically.

## Advanced Workflows

**REQUIRES ADVANCED WORKFLOW LICENCE PER DEVICE**

**ABILITY TO CREATE CUSTOM FIELDS FOR USER DATA ENTRY WHEN SCANNING:**

Free Text Entry

Boolean Yes/No Controls

Enabled/Disabled Controls

Radio Button Option Controls

Drop-down Option Controls

- All standard variables (like user account code, department code, matter billing code) as well as 'custom additional fields' can be outputted as part of the scan file name or contained within an accompanying JSON or XML file. These files can then be used by third party document management systems.
- All standard variables and custom 'additional fields' can be included in the Body and Subject of scan-to-emails.
