

APPLICANT TRACKING SYSTEM (ATS)

ATS easily integrates with job boards and other job listing sites and is user-friendly to operate. It organises and compiles candidate information and history efficiently, and can be implemented without disrupting the IT framework. It can be personalised for specific inputs for candidate sourcing, screening, and every stage of the recruitment process, including user account creation and login with role-based access. It offers job posting creation and management, application submission and tracking, multiple form checks for candidates, and coordinator and recruiter dashboards for managing job postings and applications.

Features & Benefits

Automation

ATS can automate manual processes such as job posting, communication, and interview scheduling.

Candidate Experience

ATS can help provide a better candidate experience by offering a fast and efficient application process.

Candidate Sourcing

ATS can help recruiters find top candidates for specific roles faster. Some ATS offer pre-designed job application templates that can be customised and posted on various platforms.

Compliance Management

ATS can help ensure compliance with legal and regulatory requirements, such as equal employment opportunity laws and data privacy regulations.

Onboarding Integration

ATS can help facilitate a smooth transition from hiring to onboarding by providing tools for document management and integration with 3rd party HR systems.

Collaboration

ATS can offer collaborative tools and features, such as integration with calendars and emails, and the ability to share notes within candidate profiles.
