

PRINT INFRASTRUCTURE AS A SERVICE - PIAS

A simpler, smarter way to manage your print infrastructure.

PIAS offers automated printing through a cloud-based print infrastructure with no need for print servers, reducing the high costs and IT resources associated with running and maintaining them.

What is PIAS?

Despite the digitisation of a remote workforce, the ability to print physical documents remains essential, whether the requirements are legal or driven by business efficiency. The need to print will never go away but printer drivers can.

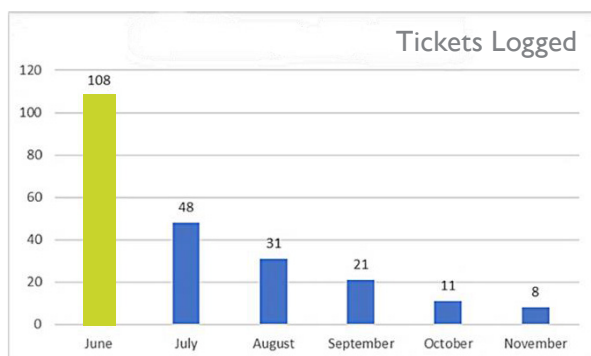

Print Infrastructure as a Service is a solution that lives in the cloud. Applications & data are managed like any other SaaS offering with no servers, applications or database administration for your IT department to manage.
